## Bulk SMS for Organizations, Companies, Political Campaigns and Charities

Bulk SMS is perfect for emergency notifications, political campaigns, integration with email & phone campaigns, mobile marketing and mobile coupons. Text messages to cell phones are the most-read media in media history. The most recent 2018 statistics show the open rate for SMS remains extremely high in 2018 with a massive [94% of all text messages read](#) within 6 minutes of receipt. If you're not using this form of communication to stay in contact with those who matter most, YOU SHOULD BE!

## How Voifone™ Bulk SMS Works

We have 2 different Bulk SMS platforms. Both are web-based and accessed through your computer's browser. They both cover more than 200 countries and more than 1,000 mobile operators. They are both priced competitively. They both use premium routes. Despite using premium routes however, the nature of sending bulk SMS is that some routes simply work better than others. If you think the delivery rate is not high enough with one platform you can try another. Billing is separate for each platform. However, if you must transfer funds from one platform to another, please contact us and we will do our best to accommodate you, although we cannot guarantee a transfer of account balances due to our own pre-payment to different SMS operators through the different platforms. You get BOTH platforms when your register your account. Here's a screenshot of the dashboard for each platform.

## Cell Phone Lists

We do not provide cell phone lists. Customers must provide their own calling lists.

## Pricing & Disclosures

Message delivery pricing for both platforms is [posted on our website](#). Fees are paid online, in advance. We deduct our merchant fees from your payment and apply the net amount we receive from our financial institution(s) to your account. Larger customers are encouraged to pay via bank wire for the most efficient and low-cost payment method. The per-message fee is deducted from your balance for every message sent, whether delivered or not. This is because ALL cell phone carriers charge back these expenses to us, so we pass it on to our customers as they do to their customers (us). Platforms are priced and billed separately. Balance is available on the Commercial Platform within the user portal.
